Education

Budapest University of Technology and Economics

Budapest, 2024

Bsc, Computer Science Engineering

Experience

Knorr-Bremse R&D Center

May 2023 - Present

DevOps Developer Trainee

- Developed tools to support the software architecture design.
- Worked on automating a unit test execution and result evaluation framework for safety-critical embedded software.

Tech Mahindra

January 2022 - March 2023

Associate Data Annotator

- Worked closely with machine learning, providing data needed to improve the Google Virtual Assistant's language understanding capabilities.
- Identified and made sense of language patterns.

Certifications

AWS Certified Cloud Practitioner

February 2023

- Offers a fundamental understanding of IT services and their uses in the AWS Cloud.
- Knowledge of core AWS services and use cases, billing and pricing models, security concepts, and how cloud impacts your business.

Projects

The Cloud Resume Challenge(GitHub Repositories: <u>Back-end</u>, <u>Front-end</u>.)

- Created a website front end using HTML, CSS, and JavaScript and deployed a static website in S3 Buckets, pointed to them using DNS domain name and used SSL/TLS certificate.
- Worked with DynamoDB and AWS Lambda using python and created RestAPI using API Gateway to communicate with the back end.
- Provisioned the infrastructure as Infrastructure as Code using AWS SAM.
- Wrote test cases and automated the testing and deployment using CloudFormation and GitHub Actions and created CI/CD pipeline to automate the front-end deployment.

Technical Skills
